OVERVIEW OF THE PUBLIC USE FILE

This section provides an overview of the Medicare Health Outcomes Survey (HOS) *Cohort II Follow-Up* Public Use File (C2RPUF.TXT), including the general characteristics of the data set and a description of the fields contained within it. The *Medicare Health Outcomes Survey Description* section (B) in this Data User's Guide provides a general description of the HOS background and methodology including the sampling methodology, data collection, and survey components. For a more detailed discussion of these items, please refer to the *HEDIS® 2001, Volume 6: Specifications for the Medicare Health Outcomes Survey*¹ (referred to as the *2001 HOS Manual*).

GENERAL CHARACTERISTICS OF THE DATA SET

The 1999 *Cohort II Baseline* Medicare HOS included a random sample of 301,184 beneficiaries, including both the aged and disabled. Between 1999 and 2001, a number of M+COs discontinued offering managed care to beneficiaries, or consolidated with other health plans. As a result of these changes, 160 managed care market areas or reporting units and 88,468 beneficiaries remained eligible at the time of the 2001 *Cohort II Follow-Up* survey. Beneficiaries were eligible for follow up if they were still alive, enrolled in their original M+CO, and had a calculatable SF-36® Physical Component Summary (PCS) score and/or Mental Component Summary (MCS) score at baseline.²

Of the 88,468 individuals sampled at the time of follow up, 83.8% (74,169) completed the follow up survey and are included in the C2RPUF.TXT data set. For the purposes of this data set, a completed survey was defined as a survey with at least one question item completed and a survey disposition code equal to M10, M11, M31, T10, T11 or T31 (please refer to page D19). The C2RPUF.TXT data set is a fixed-width ASCII text file (8.9 megabytes in size). There are a total of 102 variables and 74,169 beneficiary records in the C2RPUF.TXT data set. Each row in the C2RPUF.TXT data set represents an HOS survey, also referred to as a beneficiary record.

This Public Use File (PUF) has been modified from the original *Cohort II Follow-Up* data set in order to preserve the confidentiality at the beneficiary and plan levels. Many demographic and plan-level variables have been omitted from this file or have been collapsed into fewer categories [see *Limitations of the Data* section (C)]. Sensitive beneficiary identifying variables [such as a social security number, health insurance claim (HIC) number, beneficiary's name, etc.] have been removed and replaced with a unique nine-digit randomly assigned number.

¹ National Committee for Quality Assurance. *HEDIS® 2001, Volume 6: Specifications for the Medicare Health Outcomes Survey*. Washington DC: NCQA Publication, 2001.

² SF-36® is a registered trademark of the Medical Outcomes Trust.

The 102 variables in the C2RPUF.TXT data set are organized into four different groups:

- ◆ identification and demographics
- ◆ survey question responses
- ◆ survey administration
- ◆ additional variable

Please note, if you are interested in merged Cohort II Baseline and Cohort II Follow-Up data, please refer to the Cohort II Analytic PUF.

DESCRIPTION OF FIELDS IN THE DATA SET

The following provides instructions for interpreting the specific variables contained within the data set.

Identification and Demographics

- ◆ **Unique Identification Number**, Variable: 1
This is a unique 9-digit number that is randomly assigned for each beneficiary record. Positions 1 through 3 identify the follow-up cohort in which the respondent was surveyed. Positions 4 through 9 contain a random number. For the baseline survey administration, any beneficiary surveyed in a subsequent baseline cohort was assigned the same blinded identification number to allow for comparisons of those beneficiaries who were measured across multiple baseline cohorts. However, due to confidentiality issues, the identification number assigned in the follow-up cohort public use file does not correspond to the identification number assigned in the baseline cohort public use file. Please note, if you are interested in merged *Cohort II Baseline* and *Cohort II Follow-Up* data, please refer to the *Cohort II Analytic PUF*. The data set is sorted by this unique identification number.
Example: R02000021
Source: variable created by Health Services Advisory Group during production of the C2RPUF.TXT data set
- ◆ **Age Group**, Variable: 2
Age group of the beneficiary
Source: CMS Medicare Enrollment Database
- ◆ **Race**, Variable: 3
Self-reported race of the beneficiary
Source: Q49 from survey

- ◆ **Gender**, Variable: 4
Self-reported gender of the beneficiary
Source: Q47 from survey
- ◆ **Marital Status**, Variable: 5
Self-reported marital status of the beneficiary
Source: Q50 from survey
- ◆ **Education Level**, Variable: 6
Self-reported educational attainment of the beneficiary
Source: Q51 from survey

Survey Question Responses

- ◆ **SF-36[®] Questions**, Variables: 7 through 42
These variables represent the SF-36[®] survey questions, which can be found on pages 39 through 41 of the *2001 HOS Manual*. SF-36[®] survey questions include questions Q1 through Q11d in the HOS Questionnaire. Please refer to the *Medicare Health Outcomes Survey Description* section (B) in this Data User's Guide for a more detailed description of the SF-36[®].
- ◆ **Additional Physical, Mental, and General Activity Questions**, Variables: 43 through 96
These variables comprise the balance of the physical, mental, and general activity survey questions found on pages 42 through 50 of the *2001 HOS Manual*. These variables include most of the remaining questions Q12 through Q57 in the HOS Questionnaire. Selected questions contained in the survey are not available in this PUF data set due to confidentiality issues. Please refer to the *Medicare Health Outcomes Survey Description* section (B) in this Data User's Guide for a more detailed outline of these questions.

Survey Administration

- ◆ **Survey Disposition**, Variable: 97
Identifies completion status and mode by which the survey was completed
Source: NCQA-certified HOS Vendor
- ◆ **Round Survey Returned**, Variable: 98
Stage in which survey was returned to a vendor
Source: NCQA-certified HOS Vendor
- ◆ **Percent of Survey Completed**, Variable: 99
Percentage of the survey completed by the respondent
Source: variable created by Health Services Advisory Group during the data cleaning and processing of the *Cohort II Follow-Up* data file

- ◆ **Cohort Identifier**, Variable: 100
Cohort in which the HOS surveys contained in this data set were submitted
SPECIAL NOTE: This value for each record will equal “R02”
Source: variable created by Health Services Advisory Group during production of the C2RPUF.TXT data set

- ◆ **CMS Plan Region**, Variable: 101
CMS Regional office to which the plan belongs
Source: CMS May 2002 Monthly Report of Managed Care Health Plans

Additional Variable

- ◆ **Survey Language**, Variable: 102
Language in which the survey was completed. This variable was new in the *Cohort II Baseline* survey administration protocol.
Source: NCQA-certified HOS Vendor

Further details of the contents of the data set are available in the *Field Index with Field Descriptions* section (D) of this Data User's Guide.

TECHNICAL ASSISTANCE

The Medicare HOS Information and Technical Support Telephone Line (1-888-880-0077) as well as the HOS e-mail address (hos.azpro@sdps.org) are available to provide technical assistance.

MEDICARE HEALTH OUTCOMES SURVEY DESCRIPTION

This section provides a description of the HOS background and methodology including the sampling methodology, data collection, and survey components.

BACKGROUND

The Centers for Medicare & Medicaid Services (CMS) is committed to monitoring the quality of care provided by M+COs. To better evaluate care, CMS, in collaboration with the National Committee for Quality Assurance (NCQA), launched the first Medicare managed care health outcomes measure in the Health Plan Employer Data and Information Set (HEDIS[®]) in 1998.³ This measure was initially titled Health of Seniors, and was renamed the Medicare Health Outcomes Survey (HOS) during the first year of implementation. This name change was intended to reflect the inclusion of Medicare recipients who are disabled and not seniors (age 65 and older) in the sampling methodology. The HOS design is based on a randomly selected sample of individuals from each participating M+CO and measures physical and mental health over a two-year period.

The HOS measure is an assessment of a health plan's ability to maintain or improve the physical and mental health functioning of beneficiaries enrolled in Medicare M+COs over a two-year period of time. The functional status of the elderly is known to decline over such a period.⁴ The HOS results were computed using a set of case-mix/risk-adjustment factors, adjusting for expected differences. The differences between the baseline and the two-year follow-up physical and mental health scores are presented in terms of the percentages of beneficiaries who were better, the same, or worse than expected. The resulting aggregation of these scores across beneficiaries within a plan yields the HOS plan level Performance Measurement results. These results are specific to each individual plan. HOS results are an important part of CMS' quality improvement activities, since current law authorizes Quality Improvement Organizations (QIOs) to review the quality of care provided to people with Medicare. The goals of HOS are to help beneficiaries make informed health care choices and to promote quality improvement based on competition.

The HOS measure was developed under the guidance of a Technical Expert Panel (TEP) comprised of individuals with specific expertise in the health care industry and outcomes measurement. The TEP continues to oversee and develop the science of the HOS measure. The CMS has contracted with NCQA to support the standardized administration of the HOS survey including selecting, training, and certifying independent survey vendors that the plans contract with to administer the survey.

⁴ National Committee for Quality Assurance. *HEDIS[®] 2001, Volume 6: Specifications for the Medicare Health Outcomes Survey*. Washington DC: NCQA Publication, 2001.

SAMPLING METHODOLOGY

Beginning in 1998, and continuing annually, a HOS *Baseline Cohort* has been created from a random sample of 1,000 Medicare members from each applicable Medicare contract market area. The CMS selected the random samples for each baseline cohort. The year 2000 marked the first year in which a HOS *Follow-Up Cohort* of data was collected on beneficiaries sampled two-years previously. The *Cohort II Follow-Up* sample was limited to those beneficiaries, including both the aged and disabled, who had a calculatable PCS and/or MCS score at baseline, were still alive, and were enrolled in their original M+CO. For additional information on the follow-up sample inclusion criteria, please refer to the *2001 HOS Manual*.

In 1998, CMS required Medicare Managed Care Organizations (MCOs) with contracts in effect on or before January 1, 1997 to participate in HOS. Some Medicare MCOs were required to report by market areas defined as geographic areas containing more than 5,000 members that are generally served by distinctly separate networks of service providers (referred to as “contract markets”). In 1999, CMS required all M+COs and section 1876 risk and cost health plans with contracts in place on or before January 1, 1998 to participate in HOS. In addition, selected PACE (Programs of All-inclusive Care for the Elderly) plans, EverCare plans, and demonstration risk plans participated in the second year administration. A Spanish language version of the survey was also incorporated into the survey protocol. In 2000, CMS required all M+COs, continuing cost contractors, PACE plans, Social HMOs, Medicare Choices Demonstration plans, and Department of Defense (DOD) Subvention Demonstration plans with contracts in place on or before January 1, 1999 to participate in the *Cohort III Baseline* survey. All plans with contracts in place on or before January 1, 1997 that participated in the *Cohort I Baseline* survey in 1998 were required to participate in the *Cohort I Follow-Up* survey. In 2001, CMS required all M+COs, continuing cost contractors, PACE plans, Social HMOs, and Medicare Choices Demonstration plans with contracts in place on or before January 1, 2000 to participate in the *Cohort IV Baseline* survey. All plans with contracts in place on or before January 1, 1998 that participated in the *Cohort II Baseline* survey in 1999 were required to participate in the *Cohort II Follow-Up* survey.

DATA COLLECTION

M+COs must contract with an NCQA-certified HOS vendor to administer the survey. Vendors follow the protocol contained in the *2001 HOS Manual*. The standard HEDIS[®] protocol for administering the HOS employs a combination of mail and telephone survey administration. The mail component of the survey uses a standardized questionnaire, survey letters, and prenotification, and reminder/thank you postcards. Vendors review each returned mail questionnaire for legibility and completeness. If a beneficiary's responses are ambiguous, then a coding specialist employs standardized decision rules. Questionnaires can be entered into a computer manually or optically scanned into a computer readable file. For manually entered data, two separate data entry specialists must key enter responses from each questionnaire.

In those instances when beneficiaries fail to respond after the second mail survey, vendors attempt telephone follow-up (with a maximum of six attempts). Vendors also perform telephone follow-up for members who return an incomplete mail survey in order to obtain responses to missing questions. Vendors use a standardized version of a Computer Assisted Telephone Interviewing (CATI) script to collect telephone interview data for the survey. To ensure the standardization of the data collection process, vendors are prohibited from augmenting or adjusting the HOS protocol or instrument in any manner.

Periodically during the survey administration and again when data collection is completed, vendors run an edit program against each record in the data file to identify invalid data elements. At the conclusion of the data collection period, vendors perform preliminary data cleaning and editing and follow up with survey respondents, as necessary. For a more detailed discussion on data sampling, collection, and submission, please refer to the *2001 HOS Manual*.

SURVEY COMPONENTS

The HOS instrument consists of three components: the SF-36[®] Health Survey, questions for case-mix/risk-adjustment purposes, and questions added by CMS.

SF-36[®]

The SF-36[®] Health Survey is a multi-purpose, short-form health survey with 36 questions. It yields an 8-scale profile of scores as well as physical and mental health summary scores. It is a generic measure, as opposed to one that targets a specific age, disease, or treatment group. As documented in more than 2,400 published articles involving over 150 diseases and conditions, the SF-36[®] has proven useful in both general and specific populations, comparing the relative burden of diseases, differentiating the health benefits produced by a wide range of different treatments, and screening individual patients. Detailed information about the history, development, and scoring of the SF-36[®] is available in two user's manuals.^{5, 6}

⁵ Ware JE, Snow KK, Kosinski M, Gandek B. *SF-36[®] Health Survey Manual and Interpretation Guide*. Boston, MA: The Health Institute, 1993.

⁶ Ware JE, Kosinski M. *SF-36[®] Physical and Mental Health Summary Scales: A Manual for Users of Version 1, Second Edition*. Lincoln, RI: QualityMetric, Incorporated, 2001.

SF-36[®] survey questions are comprised of the following:

- General health question (Q1)
- Health transition question (Q2)
- Vigorous activities question (Q3a)
- Moderate activities question (Q3b)
- Lifting or carrying groceries question (Q3c)
- Climbing several flights of stairs question (Q3d)
- Climbing one flight of stairs question (Q3e)
- Bending, kneeling, or stooping question (Q3f)
- Walking more than a mile question (Q3g)
- Walking several blocks question (Q3h)
- Walking one block question (Q3i)
- Bathing or dressing question (Q3j)
- Physical health limiting time spent on activities question (Q4a)
- Physical health limiting amount accomplished question (Q4b)
- Physical health limiting the kind of activities question (Q4c)
- Physical health causing difficulty performing activities question (Q4d)
- Emotional problems limiting time spent on activities question (Q5a)
- Emotional problems limiting amount accomplished question (Q5b)
- Emotional problems limiting carefulness (Q5c)
- Extent health interfering with social activities question (Q6)
- Bodily pain question (Q7)
- Pain interfering with work question (Q8)
- Full of pep question (Q9a)
- Nervous question (Q9b)
- Down in the dumps question (Q9c)
- Calm and peaceful question (Q9d)
- Lots of energy question (Q9e)
- Downhearted and blue question (Q9f)
- Feeling worn out question (Q9g)
- Happy question (Q9h)
- Feeling tired question (Q9i)
- Amount of time health interfering with social activities question (Q10)
- Sick easier question (Q11a)
- As healthy question (Q11b)
- Future health question (Q11c)
- Excellent health question (Q11d)

Additional Physical, Mental, and General Activity Questions

Along with the SF-36[®], the HOS includes additional items that provide essential information for adjusting observed outcomes to account for risk that may be outside of a plan's control. Such variables include:

- ◆ *Impairment of Activities of Daily Living:*
 - bathing (Q12a)
 - dressing (Q12b)
 - eating (Q12c)
 - getting in or out of chairs (Q12d)
 - walking (Q12e)
 - using the toilet (Q12f)

- ◆ *Chest pain/pressure during exercise (Q13a)*
- ◆ *Chest pain/pressure when resting (Q13b)*
- ◆ *Shortness of breath when lying flat (Q14a)*
- ◆ *Shortness of breath when sitting/resting (Q14b)*
- ◆ *Shortness of breath when walking less than one block (Q14c)*
- ◆ *Shortness of breath when climbing one flight of stairs (Q14d)*
- ◆ *Numbness or loss of feeling in feet (Q15a)*
- ◆ *Ankles or legs that swell during the day (Q15b)*
- ◆ *Tingling or burning sensation in feet, especially at night (Q15c)*
- ◆ *Decreased ability to feel hot or cold with feet (Q15d)*
- ◆ *Sores or wounds on feet that do not heal (Q15e)*
- ◆ *Paralysis or weakness (Q16a)*
- ◆ *Lost ability to talk (Q16b)*
- ◆ *Ability to read newspaper print (Q17)*
- ◆ *Ability to hear (Q18)*
- ◆ *Acid indigestion or heartburn (Q19)*
- ◆ *Difficulty controlling urination (Q20)*

- ◆ *Chronic Medical Conditions:*
 - hypertension or high blood pressure (Q21)
 - angina pectoris or coronary artery disease (Q22)
 - congestive heart failure (Q23)
 - myocardial infarction or heart attack (Q24)
 - other heart conditions (Q25)
 - stroke (Q26)
 - emphysema, asthma, or Chronic Obstructive Pulmonary Disease (Q27)
 - Crohn's disease, ulcerative colitis, or inflammatory bowel disease (Q28)
 - arthritis of the hip or knee (Q29)
 - arthritis of the hand or wrist (Q30)
 - sciatica (Q31)
 - diabetes, high blood sugar, or sugar in the urine (Q32)
 - any cancer (other than skin cancer) (Q33)

- ◆ *Measure of arthritis pain (Q34)*

- ◆ *Cancer Treatment (Q35):*
 - colon or rectal cancer
 - lung cancer
 - breast cancer
 - prostate cancer

- ◆ *Interference of low back pain (Q36)*
- ◆ *Legs experiencing pain, numbness, or tingling (Q37)*
- ◆ *Depression screening questions (Q38 through Q40)*
- ◆ *Health compared to one year ago (Q41)*
- ◆ *Smoking questions (Q42 through Q45)*

- ◆ *Demographics*
 - Year of birth (Q46 – not available in C2RPUF.TXT)
 - Gender (Q47)
 - Hispanic or Spanish family background (Q48 – not available in C2RPUF.TXT)
 - Race (Q49)
 - Marital status (Q50)
 - Education (Q51)
 - Residential status questions (Q52 through Q54; Q52 is not available in C2RPUF.TXT)
 - Person completing the survey (Q55)
 - Name of person completing the survey (Q56 – not available in C2RPUF.TXT)
 - Income (Q57 – not available in C2RPUF.TXT)

Special Notes:

- ◆ Selected questions that appear in the *2001 HOS Manual* are not available in the C2RPUF.TXT data set. These questions were excluded due to confidentiality issues [see *Limitations of the Data* section (C)].

- ◆ The HOS Questionnaire contains multiple skip patterns. Caution should be exercised when examining selected questions that involve skip pattern responses. Please refer to the *Field Index with Field Descriptions* section (D) for additional information.

- ◆ When the sampled beneficiary was unable to complete the survey, the HOS protocol allows for the utilization of a proxy respondent. Surveys completed either by the respondent themselves or by proxy respondents are included in this data set.

- ◆ Minor modifications to the HOS questionnaire occurred between the administration of the 1998 *Cohort I Baseline* and the 1999 *Cohort II Baseline* surveys. One question was removed from the instrument [Visiting a doctor question (Q45 in the *Cohort I Baseline* survey)]. The reference period of the smoking cessation questions was reduced from 12 to 6 months [Quit

smoking question (Q44) and Smoking advice question (Q45 in the *Cohort II Baseline* survey)]. Please refer to the *Field Index with Field Descriptions* section (D) for additional information. Caution should be exercised when examining the data across multiple cohorts.

LIMITATIONS OF THE DATA

This section illustrates the limitations of the data set, including issues relative to the collapsing of selected variable categories and the identification of Medicare beneficiaries.

COLLAPSING THE CATEGORIES OF SELECTED VARIABLES

To ensure confidentiality of beneficiaries and plans, many demographic and plan-related variables were omitted from this file or collapsed into fewer categories.

Collapsed categories include:

Variable	Scale in C2RPUF.TXT ⁷	Scale in <i>HOS Questionnaire</i> ⁸
Race of Beneficiary	1 = White 2 = Black or African American 3 = Other	1 = American Indian or Alaskan Native 2 = Asian or Pacific Islander 3 = Black or African American 4 = White 5 = Another race or multiracial
Marital Status of Beneficiary	1 = Married 2 = Non-Married	1 = Married 2 = Divorced 3 = Separated 4 = Widowed 5 = Never married
Education Level of Beneficiary	1 = Less than a high school education or GED 2 = High school education or GED 3 = Greater than a high school education or GED	1 = 8 th grade or less 2 = Some high school, but did not graduate 3 = High school graduate or GED 4 = Some college or 2 year degree 5 = 4 year college graduate 6 = More than a 4 year college degree

NOTE: All other demographic and plan-related variables appearing in the *2001 HOS Manual* have been excluded for confidentiality reasons.

CHANGES IN IDENTIFICATION OF SURVEYED BENEFICIARIES

HOS uniquely identifies beneficiaries by using the beneficiary's health insurance claim (HIC) number. However, a beneficiary's HIC number can change through special circumstances. Changes in a beneficiary's HIC number between baseline and follow-up sampling are accounted for in the sampling protocol. However, changes in a beneficiary's HIC number between baseline cohorts are not accommodated in the sampling protocol.

⁷ Scale as it is represented in C2RPUF.TXT.

⁸ Scale as it is represented in the *2001 HOS Manual*.

FIELD INDEX WITH FIELD DESCRIPTIONS

This section provides detailed information regarding the structure of the C2RPUF.TXT data set, as well as the variables included in it. The tables below include the order, position, valid values and any additional information on each variable in the data set. Variables are presented in the same order as they exist in the data set.

The C2RPUF.TXT data set:

- ◆ is a fixed-width ASCII text file of 8.9 megabytes
- ◆ consists of *Cohort II Follow-Up* HOS surveys completed in 2001
- ◆ contains a total of 102 variables and 74,169 beneficiary records
- ◆ contains a blank space for all missing values
- ◆ contains numeric values with the exception of variable numbers 1, 97, 98, and 100
- ◆ is sorted by the unique identification number

Please note, if you are interested in merged Cohort II Baseline and Cohort II Follow-Up data, please refer to the Cohort II Analytic PUF.

IDENTIFICATION AND DEMOGRAPHICS

Var #	Field Description	Field Position	Additional Information and Valid Values
1	Unique Identification Number	1 – 9	A unique 9-digit randomly assigned number for each beneficiary (SPECIAL NOTE : this variable contains a character string): Example: R02000021
2	Age Group of Beneficiary	10	Age obtained from the CMS Medicare Enrollment Database. Age is collapsed into three age groups: 1 = Less than 65 2 = 65 to 74 3 = Greater than 74
3	Race of Beneficiary	11	Beneficiary's response to Q49 from the <i>Cohort II Follow-Up</i> survey (SPECIAL NOTE : category collapsed to ensure confidentiality of beneficiaries): <i>How would you describe your race?</i> 1 = White 2 = Black or African American 3 = Other
4	Gender of Beneficiary	12	Beneficiary's response to Q47 from the <i>Cohort II Follow-Up</i> survey: <i>Are you male or female?</i> 1 = Male 2 = Female
5	Marital Status of Beneficiary	13	Beneficiary's response to Q50 from the <i>Cohort II Follow-Up</i> survey (SPECIAL NOTE : category collapsed to ensure confidentiality of beneficiaries): <i>What is your current marital status?</i> 1 = Married 2 = Non-Married
6	Education Level of Beneficiary	14	Beneficiary's response to Q51 from the <i>Cohort II Follow-Up</i> survey (SPECIAL NOTE : category collapsed to ensure confidentiality of beneficiaries): <i>What is the highest grade or level of school that you have completed?</i> 1 = Less than a high school education or GED 2 = High school education or GED 3 = Greater than a high school education or GED

SURVEY QUESTION RESPONSES

Var #	Field Description	Field Position	Additional Information and Valid Values
7	General Health Question (Q1)	15	Beneficiary's response to Q1 from the <i>Cohort II Follow-Up</i> survey: <i>In general, would you say your health is:</i> 1 = Excellent 2 = Very Good 3 = Good 4 = Fair 5 = Poor
8	Health Transition Question (Q2)	16	Beneficiary's response to Q2 from the <i>Cohort II Follow-Up</i> survey: <i>Compared to one year ago, how would you rate your health in general now?</i> 1 = Much better now than one year ago 2 = Somewhat better now than one year ago 3 = About the same as one year ago 4 = Somewhat worse now than one year ago 5 = Much worse now than one year ago
9	Vigorous Activities Question (Q3a)	17	Beneficiary's response to Q3a from the <i>Cohort II Follow-Up</i> survey: <i>Does your health limit you in these activities? If so, how much?</i> <u>Vigorous activities</u> 1 = Yes, limited a lot 2 = Yes, limited a little 3 = No, not limited at all
10	Moderate Activities Question (Q3b)	18	Beneficiary's response to Q3b from the <i>Cohort II Follow-Up</i> survey: <i>Does your health limit you in these activities? If so, how much?</i> <u>Moderate activities</u> 1 = Yes, limited a lot 2 = Yes, limited a little 3 = No, not limited at all
11	Lifting or Carrying Groceries Question (Q3c)	19	Beneficiary's response to Q3c from the <i>Cohort II Follow-Up</i> survey: <i>Does your health limit you in these activities? If so, how much?</i> <u>Lifting or Carrying Groceries</u> 1 = Yes, limited a lot 2 = Yes, limited a little 3 = No, not limited at all
12	Climbing Several Flights of Stairs Question (Q3d)	20	Beneficiary's response to Q3d from the <i>Cohort II Follow-Up</i> survey: <i>Does your health limit you in these activities? If so, how much?</i> <u>Climbing several flights of stairs</u> 1 = Yes, limited a lot 2 = Yes, limited a little 3 = No, not limited at all

SURVEY QUESTION RESPONSES (CONT.)

Var #	Field Description	Field Position	Additional Information and Valid Values
13	Climbing One Flight of Stairs Question (Q3e)	21	Beneficiary's response to Q3e from the <i>Cohort II Follow-Up</i> survey: <i>Does your health limit you in these activities? If so, how much?</i> <u>Climbing one flight of stairs</u> 1 = Yes, limited a lot 2 = Yes, limited a little 3 = No, not limited at all
14	Bending, Kneeling, or Stooping Question (Q3f)	22	Beneficiary's response to Q3f from the <i>Cohort II Follow-Up</i> survey: <i>Does your health limit you in these activities? If so, how much?</i> <u>Bending, kneeling, or stooping</u> 1 = Yes, limited a lot 2 = Yes, limited a little 3 = No, not limited at all
15	Walking More than a Mile Question (Q3g)	23	Beneficiary's response to Q3g from the <i>Cohort II Follow-Up</i> survey: <i>Does your health limit you in these activities? If so, how much?</i> <u>Walking more than a mile</u> 1 = Yes, limited a lot 2 = Yes, limited a little 3 = No, not limited at all
16	Walking Several Blocks Question (Q3h)	24	Beneficiary's response to Q3h from the <i>Cohort II Follow-Up</i> survey: <i>Does your health limit you in these activities? If so, how much?</i> <u>Walking several blocks</u> 1 = Yes, limited a lot 2 = Yes, limited a little 3 = No, not limited at all
17	Walking One Block Question (Q3i)	25	Beneficiary's response to Q3i from the <i>Cohort II Follow-Up</i> survey: <i>Does your health limit you in these activities? If so, how much?</i> <u>Walking one block</u> 1 = Yes, limited a lot 2 = Yes, limited a little 3 = No, not limited at all
18	Bathing or Dressing Question (Q3j)	26	Beneficiary's response to Q3j from the <i>Cohort II Follow-Up</i> survey: <i>Does your health limit you in these activities? If so, how much?</i> <u>Bathing or dressing yourself</u> 1 = Yes, limited a lot 2 = Yes, limited a little 3 = No, not limited at all

SURVEY QUESTION RESPONSES (CONT.)

Var #	Field Description	Field Position	Additional Information and Valid Values
19	Physical Health Limiting Time Spent on Activities Question (Q4a)	27	Beneficiary's response to Q4a from the <i>Cohort II Follow-Up</i> survey: <i>During the past 4 weeks, have you had problems with your work or other regular daily activities as a result of your physical health?</i> <u>Cut down on the amount of time you spent on work or other activities</u> 1 = Yes 2 = No
